In the Specification:

Paragraph 44 beginning on page 5, line 24 is amended as follows:

[044]   Referring to Figures 2A, 2B and 2C, example predefined series of images are shown. Each series of images 24, 26, [[35]]200 has a destination image 20 which is a representation of a destination location. Each of images in the series of images shows a representation of a location en route to the destination location.

Paragraph 72 beginning on page 9, line 2 is amended as follows:

[072]   The route request 40 is sent to the multi-media service centre 10 which processes the route request 40 by referring it to the image library 15 and route finding mechanism [[15]]13. A set 46 of four images 41, 42, 43, 44 is returned by the route finding mechanism [[15]]13 and the set of images 46 is sent to the mobile device 14 specified by the requesting device 16.

Paragraph 74 beginning on page 9, line 11 is amended as follows

[074]   Still referring to Figure 4, a second, more complex, scenario is shown in which a mobile device 14 (device 2) makes a route request 50 to the service centre 10. The route request 50 is referred to the image library 15 and route finding mechanism [[15]]13.
